

Backend Developer with 2+ years of professional experience at Zanthium Technosoft Pvt. Ltd., specializing in PHP, MySQL, REST APIs, and scalable server-side application development. Experienced in designing database architectures, optimizing complex SQL queries, and building high-performance web applications. Skilled in integrating frontend technologies including React.js and collaborating with cross-functional teams to deliver reliable and efficient software solutions. Passionate about clean code, problem-solving, and continuous learning.

Work Experience

- Developed and maintained scalable backend applications using PHP.
- Designed and optimized MySQL database structures and complex SQL queries.
- Built secure REST APIs for web and mobile applications.
- Integrated payment gateways, wallet systems, reward systems, and automation modules.
- Collaborated with frontend developers using React.js to create seamless user experiences.
- Improved application performance through query optimization and code refactoring.
- Managed deployment and version control using Git.

Technical Skills

Backend

- PHP
- Node.js
- REST APIs

Database

- MySQL
- MongoDB
- Database Design
- Query Optimization

Frontend

- React.js
- HTML5
- CSS3
- JavaScript

Tools & Technologies

- Git & GitHub
- cPanel
- Postman
- XAMPP
- Linux Server Basics

Education

Diploma in Information Technology (IT)

Key Projects

MLM & Reward Management System

- Developed automated reward distribution systems.
- Designed scalable database structures for large user volumes.

Spin & Gaming Module

- Developed spin wheel reward systems with time-based restrictions.
- Implemented secure reward validation and transaction handling.

Autopool Management System

- Created automated pool placement algorithms.
- Developed re-entry and reward distribution mechanisms.

Telegram Bot Integration

- Built automated Telegram bot features using PHP APIs.
